

OUR NEXT MEETING DAY February 7 , 2018

Introduction to Hot Tapping with Live Demonstration

Presented By Morgan Dull

Originating as a segment of Red Flame firefighting services, hot taps were utilized as a method of directing water and/or other solutions to prevent or kill pipeline blowouts or fires. In 1996, the company saw the potential for standard piping system applications and Red Flame Hot Tap Services was born. They have developed stringent in-service weld procedures, NDT inspections and fitting styles to suit nearly every application. In 2013, they were acquired by Bolttech Mannings, a company which K D V R Y H U experience developing customer solutions. In 2014 we also merged with AM Inspections, to combine an additional 30 years of Radiography experience to our existing NDT knowledge. Red Flame is now an established OEM manufacturer ready
